Wood and Semigloss Preparation

Airless Spraying

INTERIOR PAINTING

Cleans the walls from dirt, daily wear and tear. To leave a protected and renewed wall. Combine colors and designs.

CAULKING

Process of applying seal to the joints of wooden molds.

Crown moulding.

Door and window molding.

Base molding

Coferred celing.

Cabinet.

Among others.

SKIM COATING

Complete coating on ceilings and walls, with one or more spackling capabilities. Applied with a spatula or roller.

SPACKLING

Paste or putty that we use in the process of filling holes, cracks, leveling in drywall or walls. Complex repairs to ceilings and walls, a process completely carried out by professionals.

STAINED WOOD

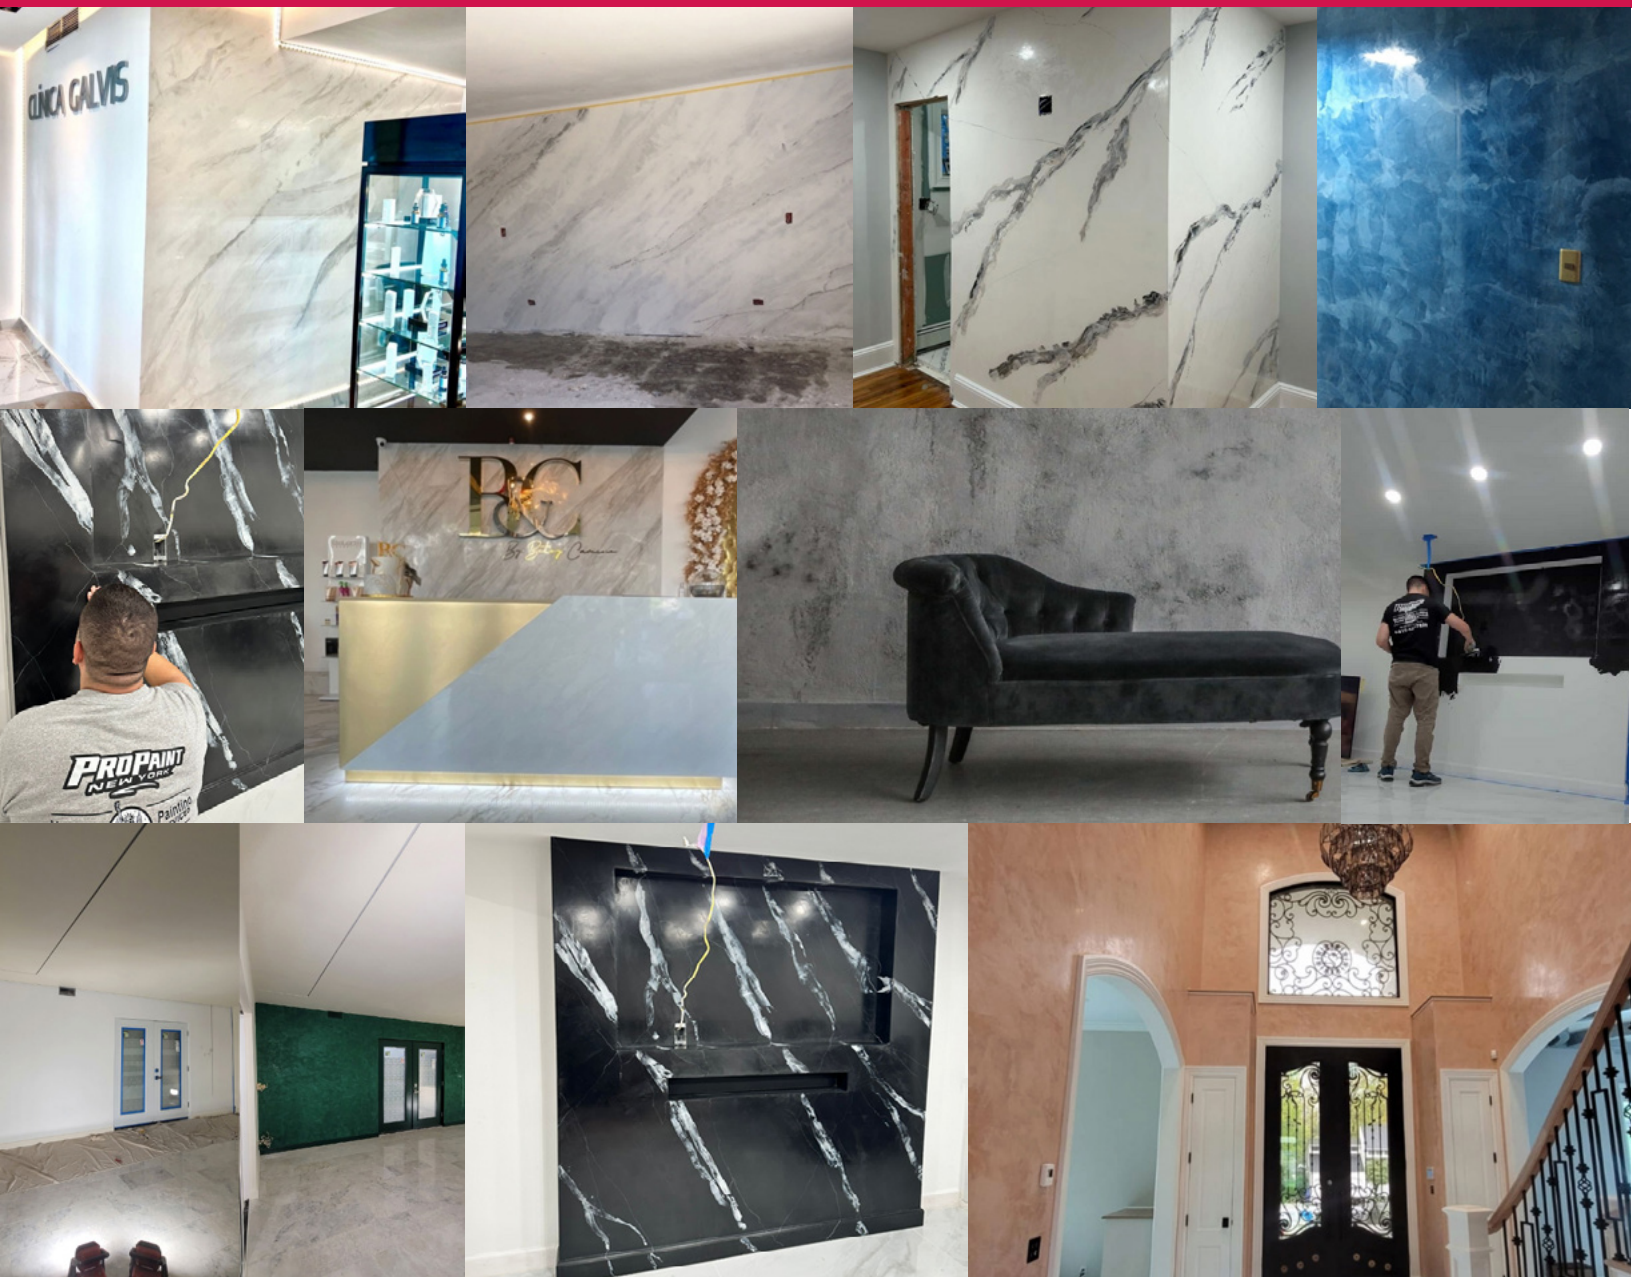

Process where we evaluate the conditions of the wood with the aim of achieving a professional finish. Clean Wood Fill and repair Final surface preparation Subsequent application of the dye on the wood, then we proceed to apply the varnish which forms a solid and transparent film that protects the wood from humidity, UV rays. We also avoid the presence of humidity or insects.

VENETIAN PLASTER

Finish similar to polished marble, applied to walls and ceilings with unique and elegant decorations. Significantly enhances the walls. Of Italian origin, it has been used since the 15th century in Venice. Covering that we can provide in any color, design or finish.

WOOD AND SEMIGLOSS PREPARATION

It consists of the application of wood primer, a meticulous and detailed inspection with lights, filling holes and imperfections with woodfiller. Professional sanding with different grades of sandpaper. Seal the joints with paintable silicone. Semigloss paint, process can be applied with an airless machine or brush and roller.

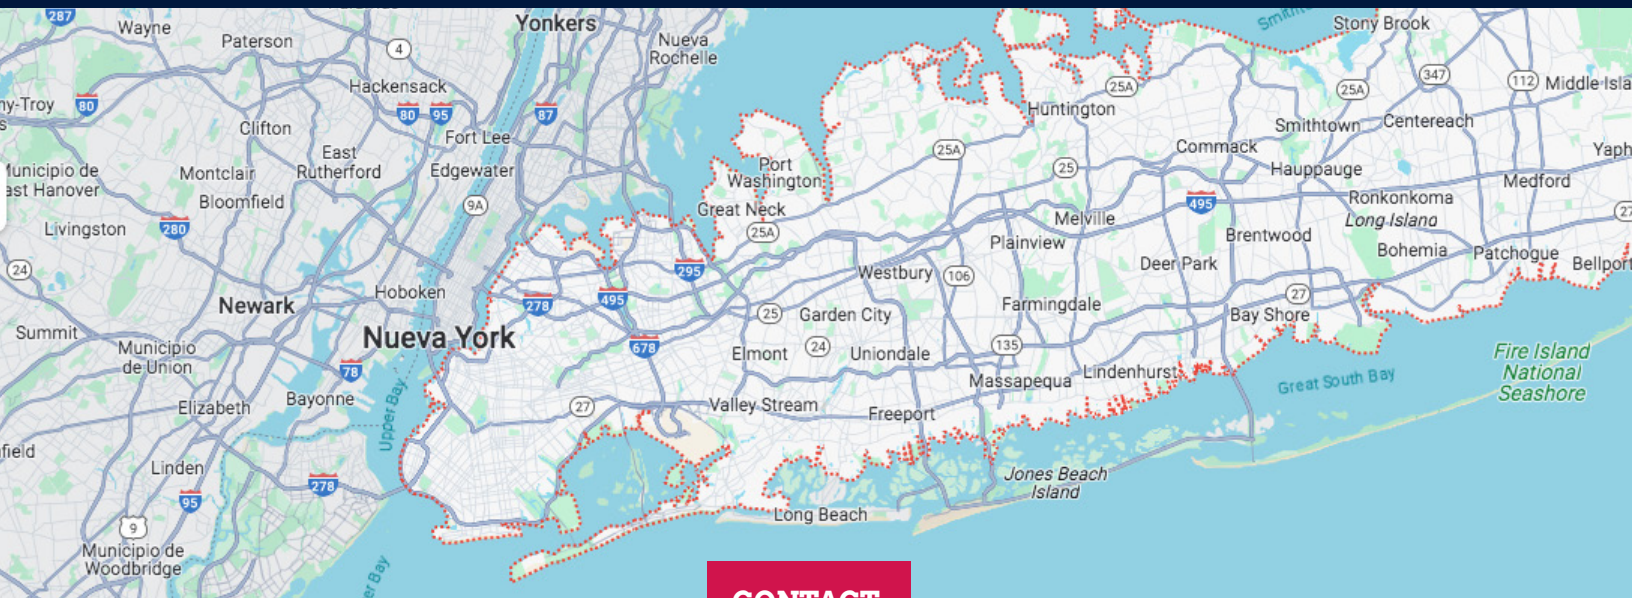

AIRLESS SPAYING

The airless spray system, ideal for the application of paints and other high viscosity materials on minor, medium and large surfaces such as walls, ceilings, floors, metal structures, walls, concrete, among other surfaces. It is used for the application of all types of paints, coatings and adhesives on metals, wood, plastics, etc. Ideal for industrial, marine and decorative paints such as varnishes, lacquers, enamels, resins, primers, putties, sealants, waterproofing, adhesives, elastomers, epoxies, etc.

Advantages of our equipment:

- **Faster process:** in a short time we can create large spaces with a small staff.
- **Surfaces with an excellent quality finish.**
- **Less material** is used and **overspray is reduced.**
- **Ideal for the most demanding surfaces.**
- **Adaptability:** from facades, roofs, buildings to road signs.
- **Projection of viscous materials.**
